SnapStore Hardware Warranty, Protection Plans, and Repair Services

Document ID: POL-SS-WAR-2026-V1 | Technical Services & Customer Assurance Division

1. Standard Manufacturer Warranty Terms

All brand-new consumer hardware and electronics purchased through SnapStore include comprehensive factory warranty protection.

Baseline 12-Month Hardware Protection

- Every new electronic device carries a minimum 365-day limited warranty covering factory defects, internal component failure, and assembly errors.
- Refurbished or open-box certified items include a mandatory 90-day SnapStore certified warranty.

Warranty Limitations and Exclusions

- Standard warranties strictly exclude damage resulting from liquid immersion, drops, cracked displays, power surges, or unauthorized third-party teardowns.
- Altering firmware, unlocking bootloaders, or installing unauthorized operating systems voids warranty coverage in full.

2. SnapStore Care+ Extended Protection Plans

Plan Tiers and Coverage Benefits

- Customers may purchase 2-year or 3-year SnapStore Care+ coverage at checkout or within 30 days of hardware delivery.
- Care+ includes Accidental Damage from Handling (ADH), drops, cracked glass screens, and liquid spills.

Service Deductibles and Claim Allowances

- Screen repair deductible: $29.00 USD for smartphones, tablets, and smartwatches.
- Full unit replacement deductible: $99.00 USD for laptops, cameras, and major appliances.
- Subscribers are entitled to up to two (2) accidental damage claims per rolling 12-month period.

3. Repair Submission and Diagnostic Workflows

Return Merchandise Authorization (RMA)

- Claims must be logged through the Warranty Portal to obtain an official RMA number and prepaid insured shipping label.
- Customer hardware is routed to the SnapStore Central Diagnostic Lab in Dallas, TX.

Turnaround Service Level Agreement (SLA)

- Standard hardware diagnosis and repair takes 5 to 7 business days from receipt at the repair facility.
- Customers receive live tracking updates at each repair stage: Intake, Diagnostic, Component Replacement, Quality Assurance, and Return Dispatch.

Customer Data Backup Notice

- Technical diagnostics may require full factory firmware restoration. Customers must back up personal files, as SnapStore assumes zero liability for lost local data.

4. Beyond Economical Repair (BER) and Replacements

Hardware Replacement Policy

• If a defective unit cannot be repaired within 10 business days, SnapStore provides an identical brand-new or certified grade-A replacement unit.

• The replacement hardware carries forward the remaining balance of the original warranty or a fresh 90-day warranty, whichever is greater.

Store Credit Buyout Option

• If identical replacement models are out of stock, customers receive 100% of the original purchase amount in store credit or an immediate refund.
